

Premium Tabletop Lateral Holder

RC Imaging tabletop
holder allows the
Radiologic Technologist
to position DR panels in
a vertical position to
achieve those difficult
cross-table lateral views.

1.25" channel depth will accommodate most DR panels with or without a panel protector.

The easy glide clamp system makes adjusting vertical height a breeze. This product features non-skid rubber feet to prevent misalignment and ensure quality images.

Weight 8 Lbs.
Base 11.5"x11.5"
Height 25"
Channel Width 1.25"
Vertical Travel .5"-25.5"

Part # A.TTP
